

ABHISHEK GUPTA

Aspiring DevOps Engineer

Gorakhpur, UP | +91-7379903349 | abhishekagp0489@gmail.com
LinkedIn | GitHub | Portfolio

SUMMARY

BCA graduate (2026), MCA student (IGNOU, distance). Hands-on with Linux systems, Bash scripting, Docker containerization, and server administration. Experienced in troubleshooting hardware and operating systems. Seeking a DevOps Intern role to contribute to CI/CD pipelines, system reliability, and infrastructure automation in a fast-paced environment.

EDUCATION

Master of Computer Applications (MCA) – Pursuing (Distance) <i>Indira Gandhi National Open University (IGNOU)</i>	2026 – 2028
Bachelor of Computer Applications (BCA) <i>Babasaheb Bhimrao Ambedkar University (Satellite Campus)</i>	2023 – 2026 <i>Lucknow, UP</i>
– Relevant Coursework: Operating Systems, Computer Networks, DBMS & SQL, Python Programming	

TECHNICAL SKILLS

Systems & Infrastructure: Linux (10+ distributions), Shell/Bash Scripting, Docker, OS Administration, Hardware Repair, Networking (SSH, TCP/IP), Nginx
Tools & CI/CD: Git/GitHub, GitHub Actions, VS Code, Postman, Virtualization
Programming & Data: Python, SQL, Flask, Data Analysis

PROJECTS & RESEARCH

Linux Server Setup & Automation <i>Linux, Bash, Docker, Nginx</i>	2026
– Administered 10+ Linux distributions on varied hardware; configured SSH, networking, and firewall rules. – Automated daily log rotation and backups with cron and shell scripts, significantly removing repetitive manual effort.	
Security Testing Lab (Dockerized) <i>Docker, Bash, OWASP Juice Shop</i>	2026
– Deployed intentionally vulnerable applications in isolated Docker containers to practise structured security testing and system log analysis in a controlled environment.	
Data Pipeline & Backend Deployment (Research) <i>Python, SQL, Git</i>	2025
– Co-authored peer-reviewed paper (IJCMA Vol 2(3)); focus shifted from pure ML to system implementation. – Built and deployed the full data handling pipeline: cleaning, transformation, and database queries with SQL.	
Fraud Detection Web Application <i>Python, Streamlit, SQL</i>	Dec 2025
– Built a data verification tool utilizing network-footprint checks; managed environment dependencies and stored/queried results securely in SQL.	

EXPERIENCE

Backend & IT Intern <i>IBM Edunet Foundation</i>	Aug 2025 – Oct 2025 <i>Remote</i>
– Developed backend features in Python and Flask web applications with version-controlled (Git), iterative delivery. – Improved application responsiveness by optimising backend processing, database queries, and local environments.	

ACHIEVEMENTS

- SigNoz Hackathon, 2025 – delivered a Dockerized observability bot through collaborative problem-solving
- TCS HackQuest Season 10 – Round 2 Qualifier; web security and cryptography challenges
- Cisco Networking Academy – Designing Cisco Security Infrastructure credential
- IJCMA Peer-Reviewed Publication, 2025 – first author on applied research
